

KVC residential services can help.

When a child's behavior becomes increasingly out of control and parents need somewhere to turn, there is hope for your child and help available through KVC Behavioral HealthCare's Residential Services. Located on 75 beautiful wooded acres in Kansas City, Kansas, KVC's network of professionals provides family-centered treatment and healing, meeting the unique and individual needs of each child. KVC is here to provide professional help, support and recovery to your family during this difficult time.

KVC Behavioral HealthCare, Inc. is a private, not-for-profit organization providing medical and behavioral healthcare, social services and education to children and families. KVC is the most comprehensive behavioral healthcare network in the nation, providing an extensive continuum of care for at-risk children. KVC brings children and families together, one child at a time.

KVC Behavioral HealthCare

Residential Services
for children & adolescents

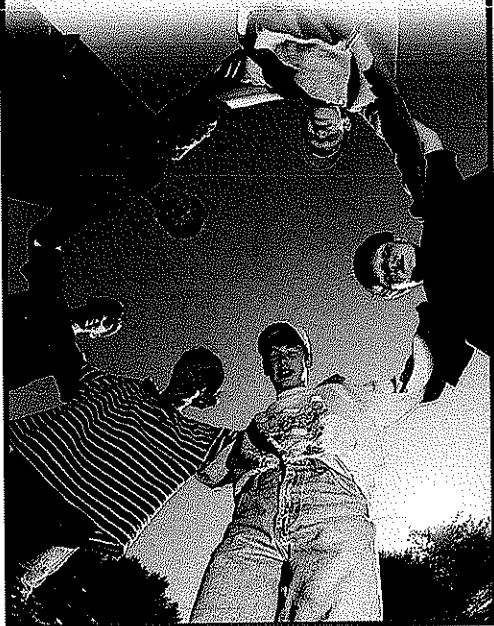

Our experienced medical team provides:

- Psychiatric services, including assessment, development and implementation of treatment plans.
- Monitoring of psychotropic medication
- Pediatric evaluation and medication management
- Social and family assessment
- Psychological testing
- Mental status examination
- Educational monitoring
- Nursing evaluation & services

Other services and therapies include:

- Individual therapy
- Family therapy
- Group therapy, including
 - anger therapy
 - men's and women's groups
 - empathy, grief and loss
 - boundaries groups

KVC staff members also focus on the activities of daily living, and provide training on anger management and social skills.

Psychiatric Hospital services support you and your child at KVC Behavioral HealthCare.

KVC operates a psychiatric hospital program for boys and girls ages 6-18. KVC meets the individual treatment needs of children and adolescents who require a high level of structure in a friendly, nurturing environment. The therapeutic environment provides a high degree of supervision while addressing individual psychiatric and behavioral issues.

KVC's intensive treatment approach is family-centered and involves the family and their support system to help resolve issues. Children and adolescents enter treatment unable to cope and leave treatment with a feeling of security and self-control.

An Inviting Facility in a Natural Setting

KVC's beautiful wooded, 75-acre hospital campus provides a calm and serene environment in which treatment can occur.

An indoor gym is available for basketball, volleyball and special events. Outdoor recreation includes a playground, basketball court, baseball field, fitness course and picnic areas.

KVC professionals can make the difference.

The medical staff at KVC is one of the finest in the area. Psychiatrists, a pediatrician, child psychologists, nurses and therapists are available around the clock to focus on the needs of the children, adolescents and their families.

KVC's Medical Director, Vishal Adma, M.D., has been with KVC since 1999.

Consider the advantages of psychiatric inpatient treatment at KVC when your child is in need. Call KVC Behavioral HealthCare today.
